Trauma Education: Day 1 - 4 overview

There is a difference in the best-practice treatment for PTSD and Complex PTSD. This program synthesises practical approaches from several modalities that are publishing positive outcomes for these clients, and presents them using actual cases that will underpin your clinical practice in traumatology. The content is applicable to both adult and adolescent populations. The techniques will be immediately useful and effective for your clinical practice. The program will explain when exposure-based interventions are indicated and appropriate, and when other therapeutic needs must be addressed first.

Day 1-2 is dedicated to treating PTSD clients utilising a cognitive behavioural approach. Day 3-4 is dedicated to the treatment of Complex PTSD (survivors of child abuse and neglect/prolonged interpersonal trauma) utilising the phase-based approach and incorporating current experiential techniques showing promising results with this population; drawn from Emotion Focused Therapy for trauma, Metacognitive Therapy, Schema Therapy, Attachment pathology treatment, Acceptance and Commitment Therapy, Cognitive Behaviour Therapy, and Dialectical Behaviour Therapy.
